SHORTHORNS

Demand for Shorthorns during the past ten months has been extremely strong every place and in the State of Missouri, it has been particularly true. Twenty breeders earmarked forty-six head especially for this sale and while the offering isn't as large as many that have been made by members of the Missouri Shorthorn Breeders' Association, the quality is higher. It is not just idle talk, because past sale records and performance of cattle purchased in these sales prove that some of the best buys of the season are always made in these Missouri events.

It is rather significant that both the grand champion female and the reserve champion bull at the last International Stock Show were bred in Missouri. Study this catalog carefully and you will see that the most prominent and modern bloodlines of the present day are well represented. There are five half-sisters and brothers to the 1949 International grand champion female that sell in this sale. A high percentage of the entire offering contains similar breeding as that of the 1949 International grand champion bull.

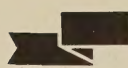

Now is the time to improve your herd and in so doing you will improve your farm and financial position. A good purebred cow herd is the best guarantee against any inflation that might be created in the future.

This is the first time a state sale has been held at Marshall, Missouri. The members of the Saline County Shorthorn Breeders' Association and the Marshall Chamber of Commerce have given wonderful support.

I urge anyone interested in good Shorthorns to make it a point to be in attendance on October 24th.

Missouri State Department of Agriculture Awards

The State of Missouri, Department of Agriculture, will award to all animals in each class that can qualify as blue ribbon, red ribbon, and white ribbon animals, their respective earned ribbons and a cash premium of \$6.00 for Blue, \$4.50 for Red, and \$3.00 for White.

These awards are made possible through an appropriation by the Missouri Legislature to encourage the production, distribution and use of better breeding animals in Missouri.

BLUE RIBBON Animals are excellent individuals.

Only animals of outstanding quality, unusually good type, symmetry, and conformation, in sufficiently good flesh and adequately fitted to demonstrate fully their qualifications will be placed in this group. These are animals of unusual merit that would in every case be a valuable addition to the top breeding herds of the state.

RED RIBBON Animals are superior individuals.

Only animals of superior quality, of good type and without any major defect, plainly demonstrating the superiority of their qualifications will be placed in this group. These animals should be sufficiently good to improve any commercial herd and most small breeders' herds.

WHITE RIBBON Animals are good individuals.

Animals of somewhat less desirable type and with one or more rather objectionable characteristics may be placed in this group. These are animals that would improve commercial herds and would in every case be superior to grade and scrub animals.

Animals which are not superior to high grade stock will be unclassified.

Rollo E. Singleton of the Livestock Division will distribute the awards at the show starting at 9:30 a.m. on Sale Day.
